SUMMARY

Software engineer and Master's student in Artificial Intelligence and Data, passionate about data analysis, machine learning, and the mathematics behind them. Experience building full-stack applications and secure distributed systems, with a solid base in algorithms and programming.

EDUCATION

Master 1 – Artificial Intelligence, Data & Agentic Systems (AIDA) <i>Université Paris Dauphine-PSL, Tunis Campus</i>	2026 – Present
Master's Degree – Networks & Distributed Systems <i>University of Tlemcen, Algeria</i>	2024 – 2026
Bachelor's Degree – Computer Science <i>University of Tlemcen, Algeria</i>	2021 – 2024

PROJECTS

IoT Secure Storage Platform – Master's Thesis <i>Distributed & cryptographic architecture for IoT data privacy</i>	Jan 2026 – Jun 2026
- Designed a multi-layered security framework for IoT networks linking data owners, IoT objects, fog nodes, cloud storage, and blockchain. - Used blockchain to store encrypted keys immutably, ensuring tamper-proof key management and decentralized authorization. - Implemented AES end-to-end data encryption with Multi-Authority Attribute-Based Encryption (MA-ABE) for fine-grained access control.	
Chartify – Income Analytics & AI-Powered Categorization <i>Full-stack SaaS platform • Node.js, Express, React, TypeScript, PostgreSQL, Drizzle ORM</i>	Aug 2026 – Present
- Building a full-stack financial platform that tracks earnings, analyzes income growth, and helps users optimize their income. - Adding AI-powered categorization to organize income and spending data automatically.	

SKILLS

Languages	Python, Java, C, TypeScript, SQL, Bash
Web & Data	React, Node.js / Express, PostgreSQL, Drizzle ORM
Foundations	Algorithms & Data Structures, Mathematics, Machine Learning, Linux, Network Security
Soft Skills	Technical Communication, Problem-Solving, Analytical Thinking

LANGUAGES

Arabic (Fluent) • English (Fluent) • French (Fluent)
