ANES TOUATI

Software Engineer • Artificial Intelligence & Data Science

Email: anes.abdelmounaim.touati@gmail.com **Phone:** +213 540 109 541 **GitHub:** github.com/anescodes

Portfolio: anestouati.tech **LinkedIn:** linkedin.com/in/anes-abdelmounaim-touati

SUMMARY

Software engineer and Master's student in Artificial Intelligence and Data, passionate about data analysis, machine learning, and the mathematics behind them. Experienced in building full-stack applications and secure distributed systems with a solid foundation in algorithms and low-level software engineering.

EDUCATION

Master 1 - Artificial Intelligence, Data & Agentic Systems (AIDA) **2026 – Present**
Université Paris Dauphine-PSL, Tunis Campus

Master's Degree - Networks & Distributed Systems **2024 – 2026**
University of Tlemcen, Algeria

Bachelor's Degree - Computer Science **2021 – 2024**
University of Tlemcen, Algeria

KEY PROJECTS

IoT Secure Storage Platform — Master's Thesis **Jan 2026 – Jun 2026**

- Designed a multi-layered security framework for IoT networks linking data owners, IoT objects, fog nodes, cloud storage, and blockchain.
- Used blockchain to store encrypted keys immutably, ensuring tamper-proof key management and decentralized authorization.
- Implemented AES end-to-end data encryption with Multi-Authority Attribute-Based Encryption (MA-ABE) for fine-grained access control.

Distributed Key-Value Store & Security Analysis **Ongoing**

- Developing a distributed key-value storage program in C focusing on high-performance concurrency and network communication.
- Performing reverse engineering and vulnerability analysis to explore security flaws and master secure coding practices in the era of AI-assisted code generation.

AI-Powered Spam Detector **Ongoing**

- Building a full-stack spam detection platform using Python, Spring Boot, and React.
- Implementing machine learning classification models to accurately recognize and classify incoming emails as spam or legitimate in real time.

Chartify — Income Analytics & AI Categorization **Aug 2026 – Present**

- Building a full-stack financial platform that tracks earnings, analyzes income growth, and optimizes user income using Node.js, Express, React, TypeScript, PostgreSQL, and Drizzle ORM.
- Integrating AI-powered categorization to organize income and spending data automatically.

TECHNICAL & PERSONAL SKILLS

Languages:	Python, Java, C, TypeScript, SQL, Bash
Web & Data:	React, Node.js / Express, Spring Boot, PostgreSQL, Drizzle ORM
Foundations:	Algorithms & Data Structures, Mathematics, Machine Learning, Linux, Network Security, Reverse Engineering
Soft Skills:	Technical Communication, Problem-Solving, Analytical Thinking

LANGUAGES

Arabic: Native / Fluent | **English:** Fluent | **French:** Fluent
